Select the specific subject area(s) of the courses in which instruction will be delivered:

☒ Art – Visual Arts
☒ Computer Education
☒ Dance
☒ Drama – Theatre Arts
☒ English/Language Arts
☐ Experimental Education
☒ Health Education
☐ Library Media
☒ Mathematics
☒ Music Education
☐ Peer Counseling
☐ Physical Education
☐ Research/Critical Thinking
☒ Science
☐ Social Studies
☒ World Languages
☒ Other

Select the qualification(s) of the instructors for the above courses:

☒ Florida Certified Teacher
☐ Community-based Expert
☐ School Nurse
☒ School Counselor
☐ School Psychologist
☐ Other

Please explain the rationale for delivering the instruction in the courses selected above for each grade level.

Rationale:
All K-12 classroom teachers will deliver developmentally appropriate substance abuse prevention material to students each year. Having all classroom teachers deliver drug prevention material instills buy-in of the entire staff and ensures that all students receive the instruction. Understanding the dangers of substance use and misuse is important, and every teacher should have the knowledge to support their students and be familiar with the information that has been presented to them. In addition, this delivery method ensures good coverage of the topic, while not overburdening any one subject area.

Please describe the methods for delivering the instruction for each grade level.

Methods of Delivery:
District-provided substance abuse education for all elementary and middle school students has occurred since 2010 and will continue using the following teacher-led model: elementary instruction will be delivered by K-5 classroom teachers during Red Ribbon Week, and middle school instruction in substance abuse will be delivered by all teachers on one specific “Drug Prevention Health Day” in October. High school instruction will be expanded from the currently existing teacher-led model utilized for high school bullying prevention instruction to include an additional “Health” Day that will address both mental health and drug prevention information. The high school Mental Health Day will occur during the month of January 2020.
Grades K-5
All elementary classes across the district will participate in Red Ribbon Week, with one district-provided lesson to be facilitated by teachers each day for four days. A four-day lesson week allows for schools to accommodate other Red Ribbon activities and speakers to ensure a fun-filled learning experience. To ensure consistency of delivery across the district, the K-12 content will be district-developed, and all lesson plans, PowerPoints, videos, handouts, and activities will be provided to teachers.

Grades 6-8:
All middle school classes across the district will participate in three Health Days, one of which is devoted solely to Drug Prevention. The Drug Prevention Health Day consists of 6, 50-minute lessons. Students will follow their normal schedule and the classroom teacher will facilitate the lessons. Lesson 1 will be taught 1st period, lesson 2 will be taught 2nd period, and so forth. Each school teaches Drug Prevention in October. Although there are target dates, schools have the flexibility of the date they choose to provide the lessons within the month outlined above. To ensure consistency of delivery across the district, the K-12 content will be district-developed, and all lesson plans, PowerPoints, videos, handouts, and activities will be provided to teachers.

Grades 9-12:
All high school classes across the district will participate in one Mental Health Day, during which two 50-minute lessons will address Drug Prevention topics. Students will follow their normal schedule and the classroom teacher will facilitate the lesson. Lesson 1 will be taught 1st period, lesson 2 will be taught 2nd period, and so forth. Schools have the flexibility of the date they choose to teach the lessons with the parameters of the lessons must be taught in one day in January of 2020 and the lessons cannot be taught on an early release day or on a Friday. To ensure consistency of delivery across the district, the K-12 content will be district-developed, and all lesson plans, PowerPoints, videos, handouts, and activities will be provided to teachers.

Virtual School:
In addition, middle and high students who participate in virtual school, will have access to a 5-hour online Wellness module that will address both mental health and drug prevention information. 1.5 hours of the training will address the dangers of juuling/vaping and correct use and misuse of prescription medications, including Opioids.

Please describe the materials and resources that will be utilized to deliver the instruction for each grade level.

To ensure consistency of delivery across the district, the K-12 content will be district-developed, and all lesson plans, PowerPoints, videos, handouts, and activities will be provided to teachers.
Elementary School

All elementary school classes across the district will participate in one Drug Prevention Health Week, completed during Red Ribbon Week.
